

Number of ICU beds per 100,000 population - ICU beds= IVA-sängar (Swe/svenska)

Number of acute care beds per 100,000 population

Data for ACBs were available for 52 countries with a mean of 413.87 ACBs/100,000 population. The U.S. and Belarus reported >700 ACBs/100,000 population (Fig. 2).¹⁵ In contrast, some European countries, including Turkey, Italy, Spain, Sweden, U.K., Iceland and Ireland reported <200 ACBs/100,000 population.¹⁵ Several Asian countries reported a moderate number of ACBs/100,000 population, including Tajikistan with 425, Kazakhstan 419, Kyrgyzstan 354, Uzbekistan 334, and Turkmenistan with 306/100,000 population.¹⁵ In regards to World Bank Income Regions, low-income regions had a mean of 425.00 ACBs/100,000 (maximum = 425, minimum = 425, range = 0, SD = 0), lower middle-income regions had a mean of 439 ACBs/100,000 (maximum = 613, minimum = 334, range = 279, SD = 127.52), upper middle-income regions had a mean of 424.75 ACBs/100,000 (maximum = 866, minimum = 210, range = 656, SD = 190.56) and high-income regions had a mean of 402.32 ACBs/100,000 (maximum = 1,119, minimum = 190, range = 929, SD = 179.58). Linear regression analysis did not reveal any significant association between the number of ACBs/100,000 and the number of deaths (Pearson coefficient = -0.078, $R^2 = 0.006$, $P = 0.585$, 95% CI: -61.725, 35.182) nor CFR (Pearson coefficient = -0.084, $R^2 = 0.007$, $P = 0.552$, 95% CI: -0.004, 0.002).
